

**NEXT LEAP IN  
PIPE EXTRUSION LINES  
FROM THE LEADERS**

**Pipe Extrusion Lines for PVC / HDPE / Garden Hose  
Suction Hose Pipe**

This development has been possible due to our rich and vast experience in manufacturing screw and barrels. Our extrusion lines will be backed up by quality benchmarking, competitive pricing and efficient after sales service.

**Single Screw & Barrel**

Our High Quality Screw Barrel incorporates state-of-the-art technology and are calibrated to meet the highest standards of performance and quality output.

**Twin Screw & Barrel**

We manufacture screw and barrels from 35 mm to 150 mm screw diameter, according to market needs for high filler, low filler applications and ISO grade.

**Conical Screw & Barrel**

The Conical Twin Screw and Barrels range is starting from 35 mm to 150 mm. These screw barrel sets are mainly used for CPVC Applications.

**High Speed Mixer Machine**

The High Speed Mixers for Rigid PVC and Soft PVC compound are designed considering high/low filler compound application as per customer's requirement.

**INFRASTRUCTURE**

We are established since 1992 with state of the art manufacturing facility located at Dhamatvan, Ahmedabad spread in plot area of 10000 sq. mtr. We have served more than 2000 customers in India and Globally. Our 70% market share in this industry segment has made us Market Leaders. Our factory is fully equipped with CNC Thread Milling Machine (4 meters long), CNC Deep Hole boring Machine, Gun Drilling Machine, Gas Nitriding Furnace (4 meters) and other modern machineries.

Most advanced manufacturing process technology, precision machinery, stringent quality control standards and passion for new developments with continuous R and D has taken the company to a new horizon.
